Dura Mag

The Dura Mag™ battery powered electromagnetic flow meter represents McCrometer's latest innovation in our commitment to advancing solutions for managing water. Whether you're a district manager looking for a solution for multiple points of water measurement, an irrigator, grower or owner operator looking for just a few points of collecting water data, or a municipal facility looking for a flanged mag meter that is durable and accurate, the Dura Mag is an ideal solution for nearly any water manager. With a five-year battery life (and three-year battery warranty), the Dura Mag eliminates the need for AC power connection, and provides the easiest installation available on the market for a flanged mag flow meter. In addition, the Dura Mag comes equipped with an internal datalogger with 5 years of data storage to ensure you always have access to your historical data. The Dura Mag also has several telemetry-ready output options, and the converter settings are USB port accessible which eliminates accidental setting changes.

Dura Mag is available to fit a common range of line sizes, from 4" to 12" diameter pipe, and offers accuracy of +/- 1% with only 2D of upstream and 1D of downstream straight pipe required for most installations. To purchase online, see below for the most common Dura Mag options; or contact your local dealer or call the factory if you need additional options such as pulse or 4-20mA output, DC Power (10-32v), or data logger with more frequent interval.

DuraMag also has a wafer style extension of the product line to include 2 and 3", same great Dura Mag benefits, in a smaller line size.
